DUBAI

The Harrow Hat is made from natural wheat straw, a biodegradable, eco-friendly, pollution-free, and sustainable material. The hat is hand-knitted and then shaped using specially designed moulds to achieve its required form.

For the final finishing, five layers of Tung oil are applied and dried naturally in the sun. This finishing process provides the hat with its red colour, natural glow, and waterproof finish.

Hat Care & Maintenance

- Keep it in a well-ventilated area.
- Hot-air cleaning is recommended.
- Do not use water for cleaning.
- Do not store it in an airtight or compressed container.
- Do not place heavy items on the hat or crush/stack it, as this may affect its shape.

Overall, the Harrow Hat is a traditionally hand-crafted, sustainable straw hat with a natural oil finish, designed to provide durability, colour, and a distinctive appearance.
